

Sreedharan M

Full Stack Developer | ML/AI Engineer | Prompt Engineer
msreedharan07@gmail.com | +91 94087 55102 | linkedin.com/in/sreedharan | github.com/Sreedharan07 | Chennai, TN

SUMMARY

2nd-year B.Tech CSE student at SRM University, Vadapalani specializing in full-stack development, ML/AI engineering, and prompt engineering. Builds production-grade applications with Flask/React, PyTorch deep learning models, and Claude API-powered tools. Passionate about deepfake detection research and computer vision.

EDUCATION

B.Tech – Computer Science & Engineering

2024– 2028

SRM University, Vadapalani · Chennai, TN | Relevant: Data Structures, DBMS, OOP, Web Technologies, OS

TECHNICAL SKILLS

Languages: C, C++, Java, Python, JavaScript

Web & Frameworks: HTML5, CSS3, Flask, React, Node.js, Jinja2, REST APIs

ML / AI: PyTorch, EfficientNet, XGBoost, OpenCV, DeepFace, FFT Analysis

Databases: MySQL, SQLite

Tools: Git, GitHub, VS Code, Postman, Electron

PROJECTS

DeepShield – Hybrid Deepfake Detection System

2025

Python · PyTorch · EfficientNet-B4 · FFT · Flask

- Architected a hybrid two-stream detector combining EfficientNet-B4 spatial analysis with an FFT frequency branch to capture both visual artifacts and spectral anomalies in facial media
- Built cross-modal fusion with learned attention weights; trained on FaceForensics++ and DFDC datasets with custom augmentation pipelines achieving high binary classification accuracy
- Developed a Flask web UI for real-time image/video inference and authored a research paper in IJCRT format documenting architecture, experiments, and results

MediCore – Hospital Management System

2024 – 2025

Python · Flask · MySQL · React / Vite · Electron

- Built a full-stack hospital DBMS with role-based access control for doctors, patients, and admins including appointment scheduling, billing workflows, and live patient queue
- Delivered dual frontends: a Jinja2 v1 with glassmorphism UI and a React/Vite v2; packaged as an Electron desktop app

GharMol – India House Price Predictor

2025

Python · XGBoost · Flask

- Built an India-specific house price prediction app covering 19 states and 83 districts using XGBoost regression with geospatial and property features

FinWise – AI Finance Advisor

2025

Python · Flask · SQLite · Claude API

- Developed an AI-powered personal finance advisor integrating Claude claude-opus-4-5 API for intelligent budgeting insights, expense tracking, and financial goal planning

ACHIEVEMENTS & ACTIVITIES

Certifications: NPTEL Elite – C Programming (IIT Kanpur) | AWS AIML Virtual Internship (AICTE-EduSkills)

Competitive Programming: Active on LeetCode & HackerRank – solved problems in DSA, queuing theory, and probability/statistics

Club / Events: Member – DNS Club, SRM Vadapalani | Participant – Mini Hacks & college-level hackathons

LANGUAGES

Tamil (Intermediate) | English (Proficient) | Hindi (Native)
